## **1** Introduction

The board on Heroes has an moves list/information section along the right hand side which contains information about the current game. This section is perhaps a swiss army knife of functionality on its own with many options to configure it.

The top part of the info section is used to display the list of moves in a match. Each game has a header with the score for this game displayed. You can click on these headers to toggle displaying the moves for this game on/off.

#### 2.1 Hover information

If you hover over a move when playing consultation matches or observing matches you will get some details of the move that was made:
